PROFILE SUMMARY

Highly skilled mobile app developer with 02 years of experience in Dart and Flutter, specializing in high- quality mobile app development. I have a proven track record in UI/UX design, performance optimization through the adept selection of tools for each situation, and leveraging testing and profiling to enhance performance. Additionally, effective collaboration is a cornerstone of my approach. Combining science and technology expertise, I am passionate about staying at the forefront of industry trends. Results-oriented, continuously improving, and ready to tackle challenges armed with technical expertise and an unshakable drive for success.

PROFESSIONAL EXPERIENCE

Flutter Development Experience

30 June 2025 to
Present -- Remote

Apify Best Apps

Working as part of a remote development team since June 30, 2025 focused on building Flutter- based mobile applications. Collaborating on project-based tasks involving seamless AI integration into app features. Our projects span diverse industries, combining sleek UI/UX with intelligent features like smart recommendations, voice assistants, and real-time data analysis. I contribute to both front-end development and AI integration, ensuring seamless user experiences across flutter apps. We follow agile workflows, prioritize clean architecture, and use tools like Firebase, REST APIs, and state management (Provider & GetX).

01 Jan 2025 to
Present-- Onsite

TeraMob Technologies

I had the opportunity to work on the **TeraMob Technologies** as part of an on-site development team, contributing to both project-based modules and long-term product development. In the project-based phase, I was responsible for rapidly building and deploying feature-specific tailored to client requirements. These projects were time-sensitive and required close coordination with UI/UX designers, backend developers, and QA teams. On the product side, I worked closely with the core team to enhance the overall application structure, optimize performance, and integrate new features that aligned with the long-term vision of the platform.

02 Feb 2024 to 08
Oct 2024-- Onsite

Alright Tech

Worked as an Intern Flutter Developer at **Alright Tech** on-site, contributing to mobile app development. Assisted in building UI screens, integrating APIs, and fixing bugs in the **Alright Tech** application. Gained practical experience with Flutter, Dart, and Firebase in a collaborative team environment. Learned agile workflows and improved coding practices under the mentorship of senior developers.

PROECTS SUMMARY

Spark Gym [Flutter Mobile App]

Developed **Spark Gym**, a fitness app offering personalized group workouts guided by expert coaches. Built using **Flutter**, with **Firebase** for real-time data, authentication, and cloud storage. Integrated features like dynamic workout plans, progress tracking, push notifications, and video sessions. Focused on combining health science, goal-based programs, and community interaction for better results.

Lecture Meet [Flutter Mobile App]

Developed a hybrid platform for booking co-working spaces, lecture halls, and event venues. Built using Flutter with Firebase and Google Maps API for location-based services and real-time booking. Features include event scheduling, seat reservation, workshop listings, and stargazing trip registrations. Designed to support entrepreneurs, educators, and creative by blending innovation with productivity.

Personalized AI GPT Assistant [Flutter Mobile App]

Built an AI chat platform enabling users to interact with ChatGPT and create custom GPTs on specific topics. Developed using **Flutter** for the frontend and integrated with **OpenAI API** for AI interactions. Features include instruction-based GPT creation, content filtering, and focused conversational outputs. Designed to deliver tailored knowledge, automation, and topic-specific support in a user-friendly interface.

Electricity Bills Check [Flutter Mobile App]

Developed a utility app for users across Pakistan to check electricity bills by provider and track usage. Built with Flutter, using **REST APIs** for real-time bill data and provider integration. Includes solar panel estimation, cost- saving calculators, and green energy awareness features. Designed for nationwide accessibility, promoting efficient energy management and eco-friendly solutions.

Bilingual Translator App [Flutter Mobile App]

Built using **Flutter**, integrated with **Google Translate API**, **TTS**, and **dictionary APIs** for real-time multilingual support. Offers translation, spell-check, pronunciation, and phrase practice for global language learners. Features include voice-assisted tools, interactive learning, and offline mode for continuous access. Designed to enhance language learning with an intuitive, bilingual user experience.

Alpha Tailor [Flutter Mobile App]

Developed a smart tailoring app using **Flutter**, **AI measurement models**, and **Firebase** for real-time order tracking. Enables digital suit measurements, online ordering, and live status updates to streamline tailoring workflows. AI reduces human error while improving fit accuracy and customer satisfaction. Built to modernize the tailoring industry with a precision-driven, end-to-end digital solution.

APP DEVELOPMENT CORE SKILLS

Flutter App Development

- State Management (GetX, Provider)
- Firebase Integration & Push Notifications
- Local Databases(SQflite, Shared Prefrences)
- REST APIS Integration
- Http Networking Request
- Localization, Animations
- Admob Ad Integration
- Clean Code, Clean Architecture
- Git & GitHub

Languages & Technologies

- Flutter
- Dart
- Github & Git
- Postman

Programming

- Deep OOP understanding, Solid Principles
- Precise knowledge of Algorithms, Data structure
- Design Patterns

Educational Background

- **Bachelor's degree - Computer Science**
Iqra University Islamabad, Pakistan
